Introduction to Programming Using Java

Understand Java fundamentals (15-20%)

- Describe the use of main in a Java application
 - Signature of main, why it is static; how to consume an instance of your own class; command-line arguments
- Perform basic input and output using standard packages
 - Print statements; import and use the Scanner class
- Evaluate the scope of a variable
 - Declare a variable within a block, class, or method

Work with data types, variables, and expressions (40-45%)

- Declare and use primitive data type variables
 - Data types, including byte, char, int, double, short, long, float, boolean; identify when precision is lost; initialization; how primitives differ from wrapper object types such as Integer and Boolean
- Construct and evaluate code that manipulates strings
 - String class and string literals, comparisons, concatenation, case and length; String.format methods; string operators; converting a primitive data type to a string; the immutable nature of strings; initialization; null
- Construct and evaluate code that creates, iterates, and manipulates arrays and array lists
 - One- and two-dimensional arrays, including initialization, null, size, iterating elements, accessing elements; array lists, including adding and removing elements, traversing the list
- Construct and evaluate code that performs parsing, casting and conversion
 - Implementing code that casts between primitive data types, converts primitive types to equivalent object types, or parses strings to numbers
- Construct and evaluate arithmetic expressions

Dr. Vilas N. Nitnaware
Principal
K.C. College of Engineering &
Management Studies & Research

- Arithmetic operators, assignment, compound assignment operators, operator precedence

Implement flow control (15-20%)

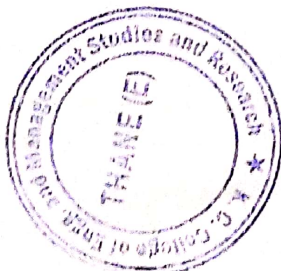

- Construct and evaluate code that uses branching statements
 - if, else, else if, switch; single-line versus block; nesting; logical and relational operators
- Construct and evaluate code that uses loops
 - while, for, for each, do while; break and continue; nesting; logical, relational, and unary operators

Perform object-oriented programming (10-15%)

- Construct and evaluate a class definition
 - Constructors; constructor overloading; one class per .java file; this keyword; inheritance and overriding at a basic level
- Declare, implement, and access data members in a class
 - private, public, protected; instance data members; static data members; using static final to create constants; describe encapsulation
- Declare, implement, and access methods
 - private, public, protected; method parameters; return type; void; return value; instance methods; static methods; overloading
- Instantiate and use a class object in a program
 - Instantiation; initialization; null; accessing and modifying data members; accessing methods; accessing and modifying static members; importing packages and classes

Compile and debug code (5-10%)

- Troubleshoot syntax errors, logic errors, and runtime errors
 - print statement debugging; output from the javac command; analyzing code for logic errors; console exceptions after running the program; evaluating a stack trace
- Implement exception handling
 - try catch finally; exception class; exception class types; display exception information

Dr. Vilas N. Nitnaware
Principal
K.C. College of Engineering &
Management Studies & Research

Introduction to Programming Using Python

Perform Operations using Data Types and Operators (20-25%)

- Evaluate an expression to identify the data type Python will assign to each variable
 - Identify str, int, float, and bool data types
- Perform data and data type operations
 - Convert from one data type to another type; construct data structures; perform indexing and slicing operations
- Determine the sequence of execution based on operator precedence
 - Assignment; Comparison; Logical; Arithmetic; Identity (is); Containment (in)
- Select the appropriate operator to achieve the intended result
 - Assignment; Comparison; Logical; Arithmetic; Identity (is); Containment (in)

Control Flow with Decisions and Loops (25-30%)

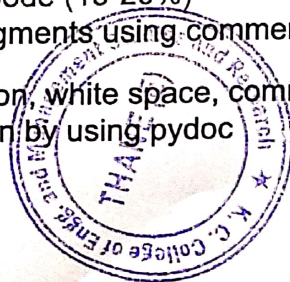

- Construct and analyze code segments that use branching statements
 - if; elif; else; nested and compound conditional expressions
- Construct and analyze code segments that perform iteration
 - while; for; break; continue; pass; nested loops and loops that include compound conditional expressions

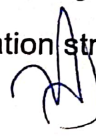

Perform Input and Output Operations (20-25%)

- Construct and analyze code segments that perform file input and output operations
 - Open; close; read; write; append; check existence; delete; with statement
- Construct and analyze code segments that perform console input and output operations
 - Read input from console; print formatted text; use of command line arguments

Document and Structure Code (15-20%)

- Document code segments using comments and documentation strings
 - Use indentation, white space, comments, and documentation strings; generate documentation by using pydoc

Dr. Vilas N. Nitnaware
Principal
K.C. College of Engineering &
Management Studies & Research

- Construct and analyze code segments that include function definitions
 - Call signatures; default values; return; def; pass

Perform Troubleshooting and Error Handling (5-10%)

- Analyze, detect, and fix code segments that have errors
 - Syntax errors; logic errors; runtime errors
- Analyze and construct code segments that handle exceptions
 - Try; except; else; finally; raise

Perform Operations Using Modules and Tools (1-5%)

- Perform basic operations using built-in modules
 - Math; datetime; io; sys; os; os.path; random
- Solve complex computing problems by using built-in modules
 - Math; datetime; random

Subject: Letter of Acknowledgement.

Respected Sir,

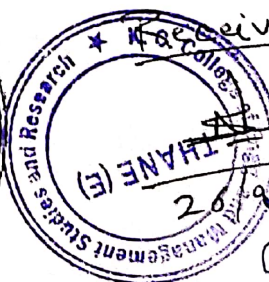

On Behalf of K.C.College of Engineering & Management Studies & Research, We offer our sincere appreciation and gratitude, for conducting seminar for SE.IT and TE.IT on "Role of Data Analytics and advance tools used in industry" on 26th Sep 2019, organized by Department of Information Technology. The session was very well received by SE and TE Students. We are grateful to you for making the session interesting and informative and thank you for building this program as a great learning for our students.

See you in future.

Yours Sincerely

Subject: - Invitation as a Speaker for "Role of Data Analytics and advance tools used in industry".

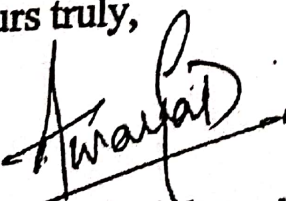

Dear Sir,

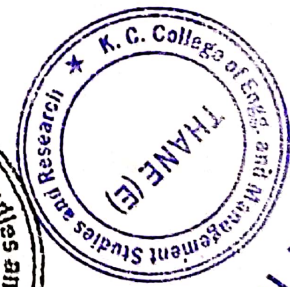

K.C.College of Engineering & Management Studies & Research, functions on a focused ambition & determination to explore & learn innovative areas in engineering. Keeping this aim in mind, we are organizing session for TEIT,SEIT on "Role of Data Analytics and advance tools used in industry", on 26th Sep 2019.

We take great pleasure to invite you as a speaker for our students, which will help them for bridging the academic and real life application of knowledge.

With Thanks & Regards

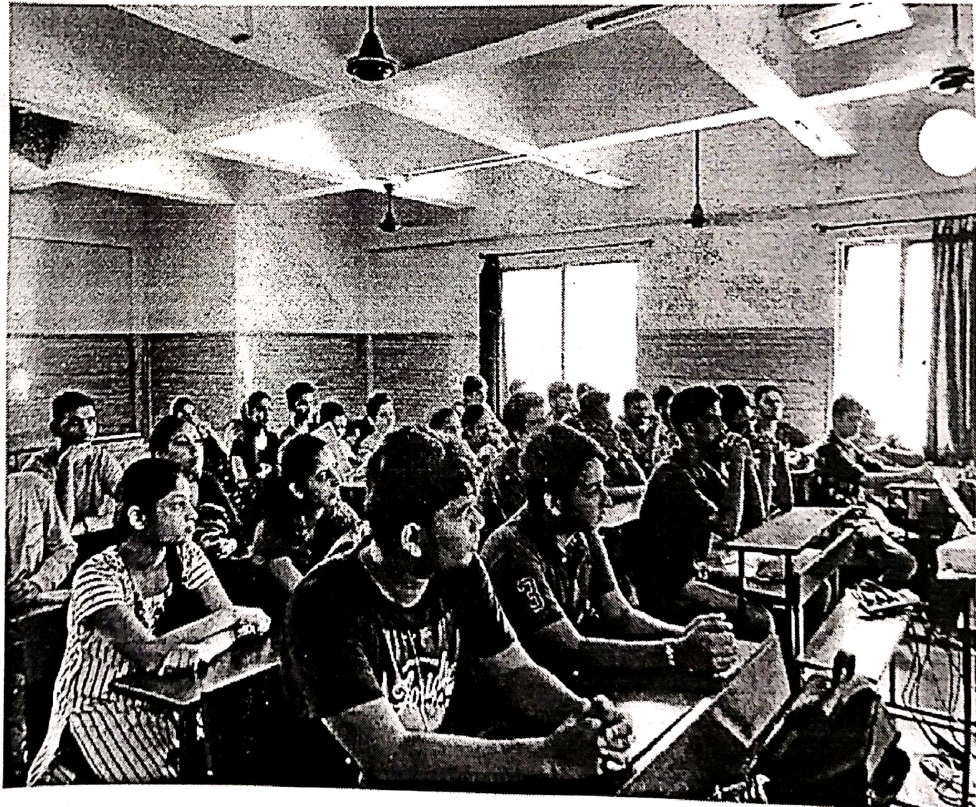

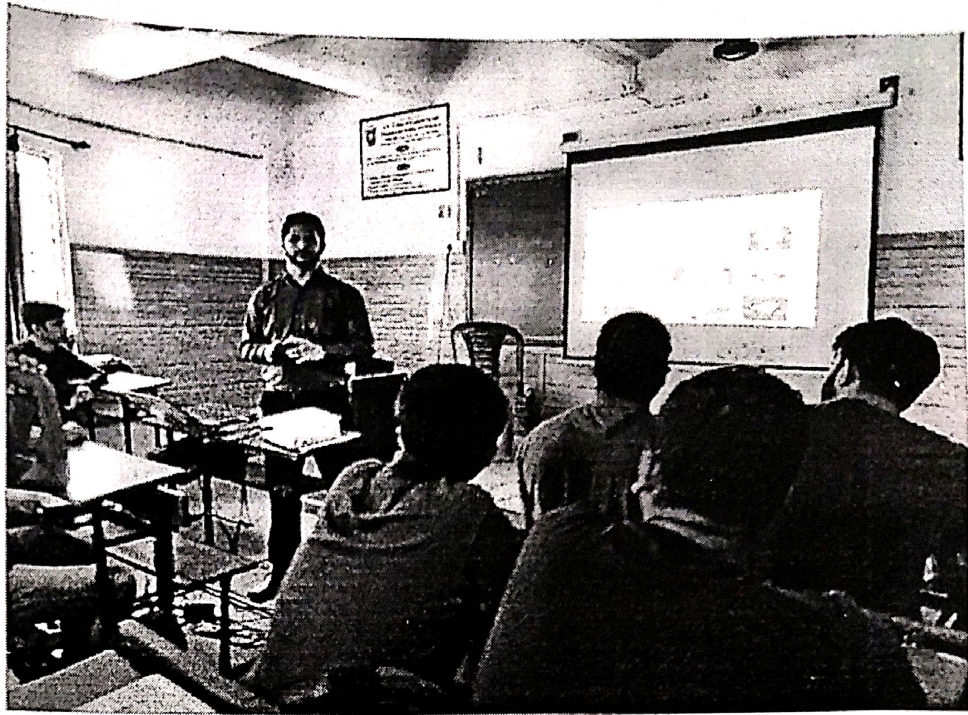

Yours truly,
